To Whom It May Concern:

Atlas Excavating constructed a \$6,500,000 construction contract for the City of Whiting in 1996 and 1997. Butler, Fairman and Seufert was the design engineer and provided construction observation for the project. The project consisted of sewer replacement, street reconstruction, sidewalks, and lighting. Significant dewatering, utility conflicts and coordination, traffic control, and subcontractor coordination were all important elements for the project.

Atlas completed the project in a satisfactory manner. All punch list and warranty issues were addressed in an expeditious manner. We would recommend Atlas Excavating as a competent contractor on projects which are similar to the Whiting project.

Very truly yours,

BUTLER, FAIRMAN and SEUFERT, INC.

John W. Brand, P.E.
