**Re: Salisbury Street Sewer Improvement Project**

Dear Mrs. Dillon,

I would like to thank you for the work that was done recently on our Salisbury Street Sewer Improvement Project. This was a smaller project with respect to the amount of pipe placed, but was a very important project to us because of its location and time constraints for construction.

From the beginning of construction through the end, Atlas was very aware of the time and traffic maintenance constraints, and worked very hard to keep all property owners satisfied. Atlas met a very tight milestone #1 deadline, even with a major request for deviation from the plans. In addition, milestones #2 - #4 were achieved well within the time limits. Last, but not least, the project was finished under budget.

There were several individuals that worked very hard to make this project a success for us, and I would like to thank them for that effort. Steve Rich was instrumental in making administrative things happen quickly. He was also willing to visit the site whenever we had an issue. Tony Kinsler and his crew were very professional and worked well within the myriad of constraints that they had in this highly urbanized area of the city. We were able to work very well with Tony to make sure that he was able to keep moving and not get delayed by any field changes. Marty Reagan and his crew topped it off with their concrete work - a lot of it custom handwork to match what was removed for construction.

Again, thank you all for a very successful project, and I look forward to possibly working with Tony and his crew again on the upcoming Western Interceptor project.

Sincerely,

Jeromy L. Grenard  
Assistant City Engineer
